# About Aerolube International

**Aerolube International** is a UAE-based trading company focused on the supply of OEM-approved Aviation, Industrial, and Marine Lubricants to customers across the UAE and international markets. With a strong focus on product authenticity, quality, and reliable sourcing.

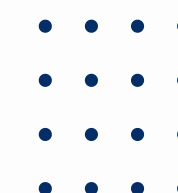

With leadership bringing over 10 years of experience in Lubricants Industry, we combine extensive industry knowledge with reliable and efficient sourcing capabilities to serve customers whose operations demand quality, performance, and product authenticity.

Our expertise spans the sourcing and supply of OEM-approved Aviation, Industrial, and Marine Lubricants, supporting customers across critical applications where the right lubricant is essential to equipment performance, operational reliability, and asset protection.

## Vision

To Supply genuine, OEM-approved Aviation, Industrial, and Marine Lubricants through trusted Global Sourcing, Deep Industry Expertise, and Uncompromising Commitment to Quality and Service.

## Mission

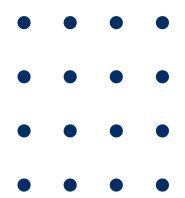

To be recognised as a trusted global partner in specialty lubricants, distinguished by product authenticity, technical expertise, reliable supply, and enduring partnerships across the Aviation, Industrial, and Marine industries.

Integrity

# Managing Director's Message

When we established Aerolube International, our vision was simple: to build a company that customers could trust, not only for genuine, high-quality lubricants, but also for honest guidance, reliable service and long-term support.

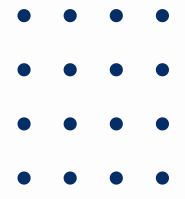

Having spent more than 10 years in the lubricants industry, I have learned that every enquiry is more than just a product requirement. Behind it is an operation that depends on the correct specification, dependable sourcing and timely delivery. This understanding continues to shape the way we work every day.

At Aerolube International, we specialise in OEM-approved Aviation, Industrial and Marine Lubricants from globally recognised brands. While products are at the heart of our business, I believe our true strength lies in the relationships we build and the responsibility we take for every requirement entrusted to us.

I sincerely thank our customers, suppliers and partners for their confidence in us. We look forward to growing together and becoming a dependable part of your continued success.

Mohammed Faraz  
Managing Director  
Aerolube International

# Why Choose Us

At **Aerolube International**, we understand that lubricant procurement is about more than simply sourcing a product. It is about quality, authenticity, specification, and dependable supply. With experienced leadership and established industry knowledge, we work closely with customers to source the right lubricants for their operational requirements, with a strong focus on genuine products from recognised global brands.

## OEM-APPROVED & GENUINE PRODUCTS

We focus on supplying genuine, OEM-approved lubricants from recognised manufacturers and established supply channels, ensuring product authenticity.

## TRUSTED GLOBAL BRANDS

We supply Industrial, Aviation and Marine Lubricants from leading global brands trusted for their quality and proven performance worldwide.

## 10+ YEARS OF INDUSTRY EXPERTISE

With over 10 years experience in trading our leadership brings strong technical knowledge and commercial understanding to every requirement.

## RELIABLE GLOBAL SOURCING

Our strong network of manufacturers, authorised channels & supply partners, enables us to ensure consistent product availability & supply across international markets.

## CUSTOMER FOCUSED APPROACH

We take time to understand our customers needs and provide solutions with the right product, specification, quantity and delivery requirement.

## LONG-TERM PARTNERSHIPS

We focus on building lasting relationships through consistent service, reliable supply, and a commitment to understanding our customers evolving requirements.

**Mobil** is a globally recognised lubricant brand with a long history of lubrication technology and engineering expertise. Its industrial portfolio is designed to protect equipment, support reliable operation and extend lubrication intervals across demanding operating environments. Mobil's solutions cover applications ranging from hydraulics, gears and bearings to compressors, turbines and mobile equipment.

**Aerolube International** supplies Mobil lubricant solutions for industrial and demanding equipment applications, subject to product specification and availability. We support customers with reliable sourcing and supply of genuine products to meet specific operational requirements.

Industrial  
Lubricants

Marine  
Lubricants

**Shell** has an extensive portfolio of industrial and marine lubricants engineered for equipment protection, reliability and operational efficiency. Its product range spans hydraulic fluids, gear oils, greases, compressor oils, turbine oils and specialised marine lubricants, supported by technical expertise and global supply capabilities.

**Aerolube International** supplies Shell industrial and marine lubricant solutions to customers requiring genuine, specification-compliant products, reliable sourcing and dependable supply. We support customers in identifying the appropriate product, viscosity grade and pack size for their equipment and operating requirements. Our supply approach prioritises product authenticity, accurate documentation and responsive communication throughout the procurement process.

Industrial  
Lubricants

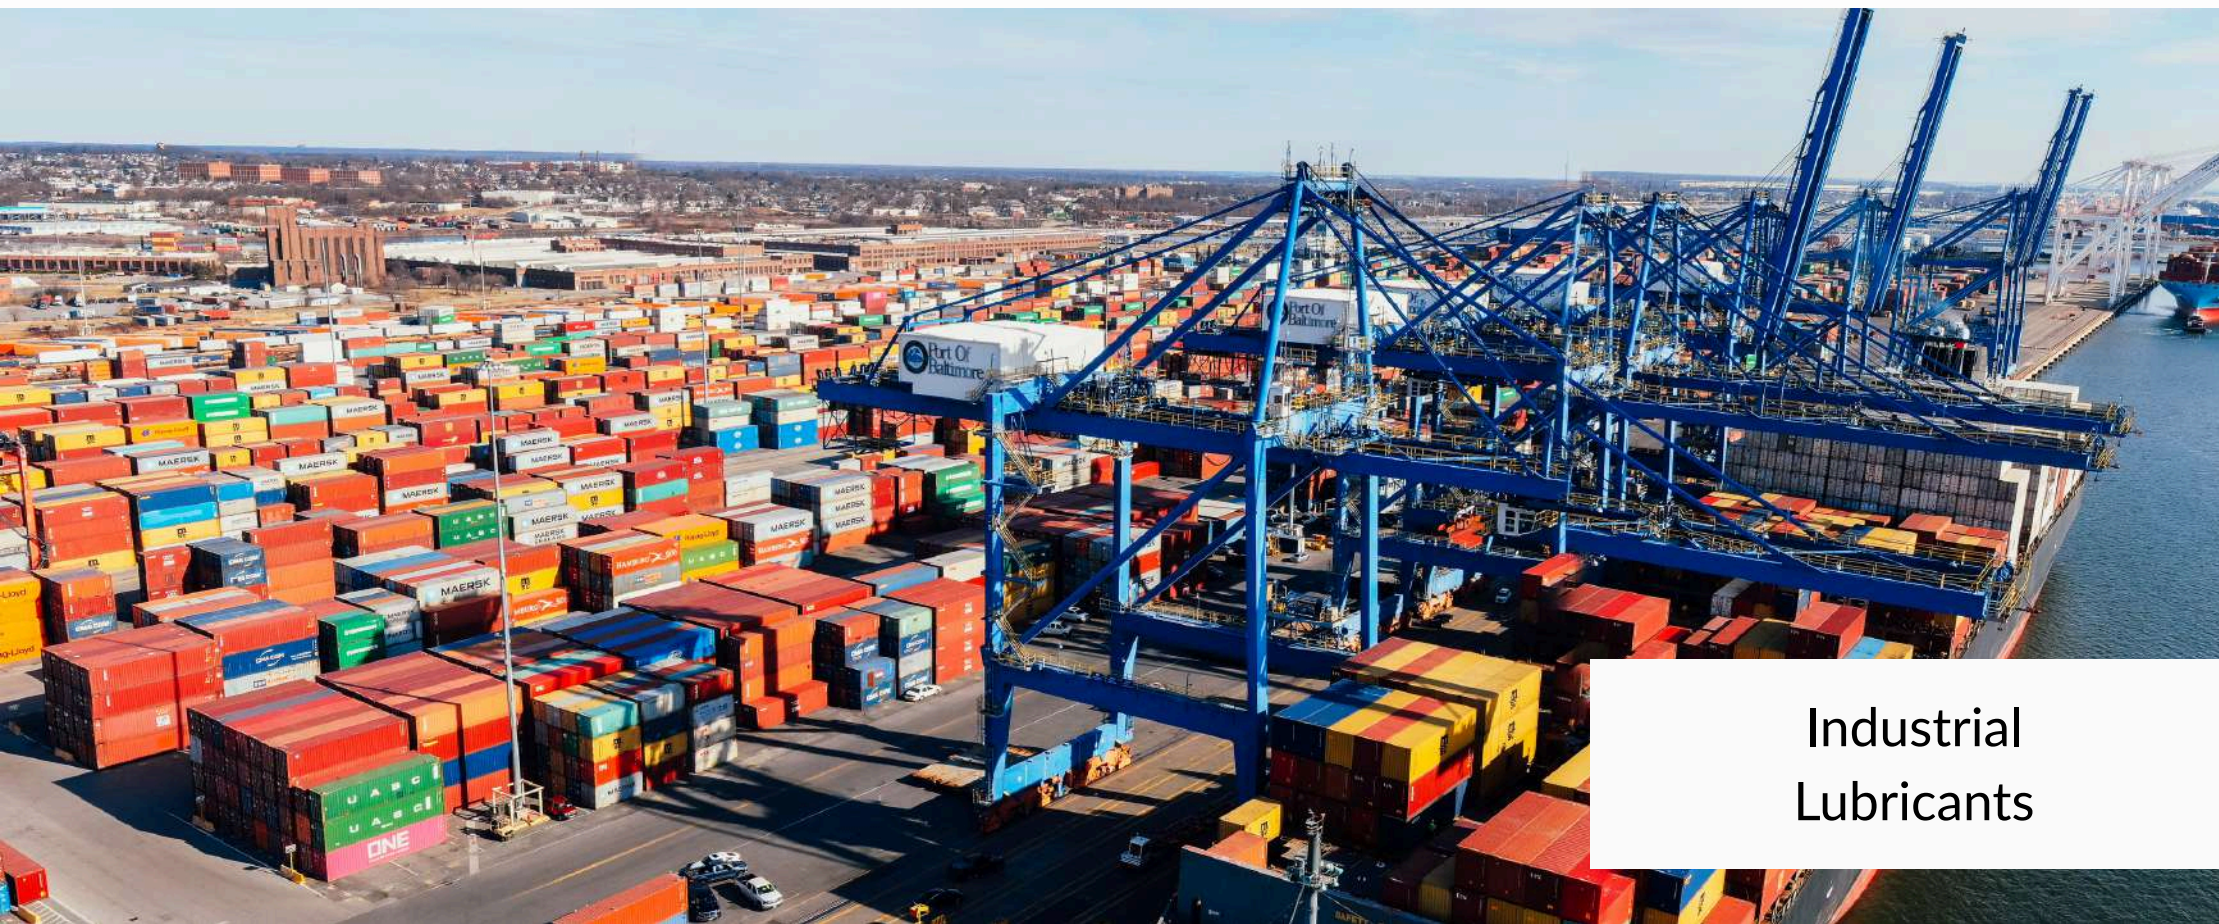

Marine  
Lubricants

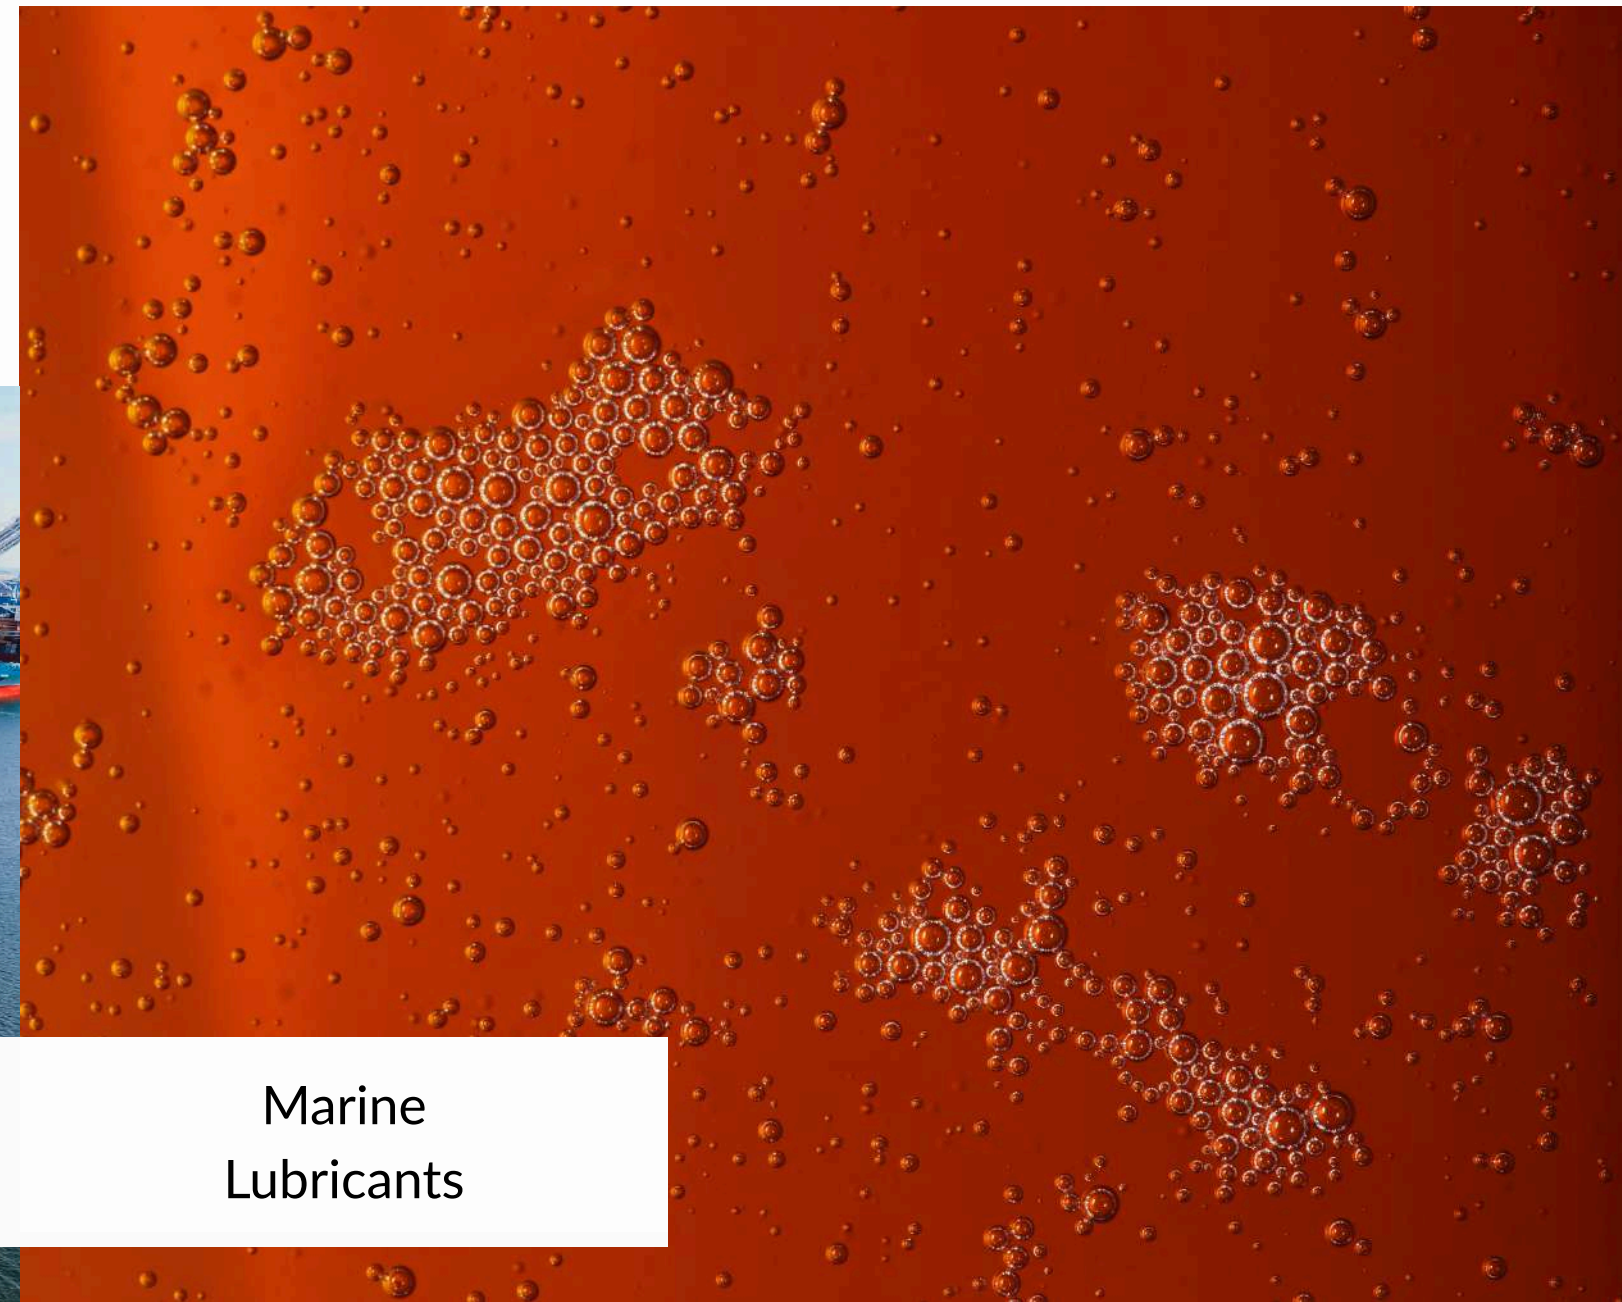

**Castrol** develops high-performance lubrication solutions designed to enhance equipment protection, reliability and productivity while helping reduce operating costs. Its industrial portfolio covers applications ranging from gears, hydraulics and compressors to turbines and metalworking processes.

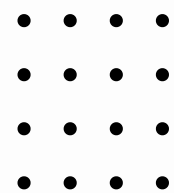

**Aerolube International** supplies genuine Castrol industrial and marine lubricants, supporting customers with reliable sourcing, product authenticity and dependable supply. With Castrol's extensive portfolio across hydraulic, gear, compressor, turbine, grease and marine applications, we help customers access the right lubrication solutions for demanding operating environments.
